First semester — warnings

- ▶ the first semester is intensive and tough
 - ▶ according to most of last year's students

 - ▶ pressure towards the end of the semester
- ▶ organisation:
 - ▶ rely on your class representants if too many deadlines collide
anticipate as much as possible (10 days ahead = too late)
 - ▶ following 5 courses in computer science can be a good choice,
but not always
 - ▶ there are possibilities for *soutien* (catch up)

warning: it might not be that easy

- to decide for a subject
- to find a training period
- to live abroad for 3 months

waiting for us to put pressure on you is not a good solution
