

Master's 1 Life Sciences and Earth & Universe Sciences – M1 SV STU

Optional electives (UE) enable students, in S1 and S2, to choose courses from those offered by the Biosciences and Earth and Planet Sciences, Environment programs.

Compulsory programs give students general professional skills: English (classical course in Semester 1, programs coupled with the learning of scientific communication in Semester 2), place of science in society (Semester 1), scientific communication (Semester 2).

The Semester 2 includes an internship of at least 7 weeks in a research laboratory.
