

INTERACTIONS, CORPUS, LEARNING, REPRESENTATIONS - ICAR

MULTIDISCIPLINARY SCIENTIFIC ACTIVITIES IN LINGUISTICS AND DIDACTICS
FOCUSED ON THE MULTIDIMENSIONAL ANALYSIS OF THE LANGUAGE' USES

<http://icar.cnrs.fr>

RESEARCH TEAMS

- LEARNING, DIDACTICS,
INTERACTIONS, KNOWLEDGE
- MEANINGS AND TEXTUALITIES
- INTERACTIONS, COGNITIONS

CROSS-CUTTING AXES

- LANGUAGE, WORK
AND LEARNING
- SUBJECTIVITY:
PHENOMENOLOGY OF
EXPERIENCE, SYMBOLIC FORMS
AND EPISTEMIC REGIMES

RESEARCH RESOURCES AND TOOLS

- **Databases**
CLAPI & CLAPI-FLE; Corail; Visa; MenHIR; PRESTO
- **Interactive Analysis Room (I-Screen)**
- **Software**
 - TransICOR: transcription software derived from transcriber software
 - Tatiana: interaction visualization and analysis software
- **Language processing chain: ALEX**
- **Training and awareness resources:** Dyslexia MOOC, Documentaries, "Impossible Communication" Devices, ODIMEDI Tool, Corinte Platform, TXM

KEY FIGURES

127 staff including: **53** permanent researchers, **53** PhD students and **13** research support staff and **16** contractors

Over the last 5 years

1187 publications

4 **Prizes and distinctions:** **1** distinction by The International Society for Learning Sciences 2020, **1** Doctor honoris causa (University of Caxias do Sul - UCS 2017), **1** medal of the State University of Tomsk (National Research Tomsk State University - Russia 2018), **1** Award of Young Research 2021 of Lyon Metropole (category "Humanity and urbanities")

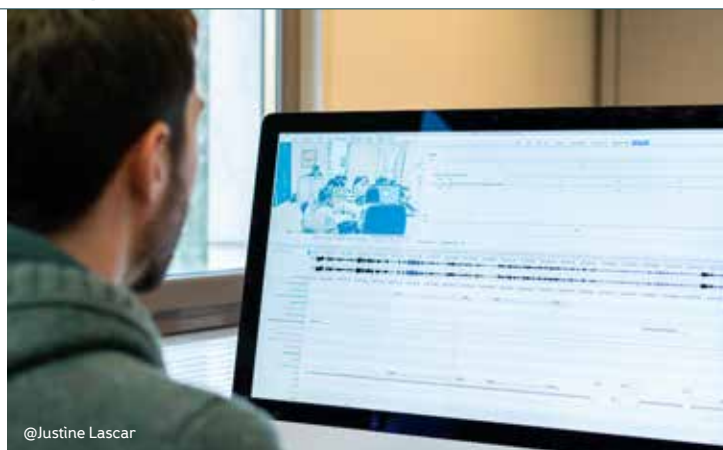

22 **public funding:** **20** national (**13** ANR in carrier, **7** ANR in partners,) and **1** European 2016 to 2020, **1** PIA carrying the ASLAN labex

23 **Private funding:** research contracts (**2** CIFRE theses), **1** start-up, **19** sponsorship agreements (women & sciences, URPS Ortho), Skilder

INTERACTIONS, CORPUS, LEARNING, REPRESENTATIONS - ICAR

@Audrey Mazur

@Justine Lascar

SPOTLIGHT ON

FROM THE LABORATORY TO THE SOCIO-ECONOMIC WORLD

Since its creation, ICAR has been part of a societal approach by participating in the creation of start-ups and developing projects involving the implementation of devices that meet strong societal needs. It is committed to a real policy of innovation, dissemination and valorization of research results. A real dynamic has been developed facilitating multidisciplinary and interdisciplinary collaboration, to best respond to societal issues.

Areas of expertise:

- Corpus linguistics in diachrony and synchrony
- Interactional Linguistics and Conversation Analysis
- Competences and semiolinguistic practices
- Training and professional spaces
- Embodied language
- Language, Health and acquisition from multidisciplinary approach
- Linguistic and interactional vulnerabilities (patient/caregiver relationship; health and migration; specific learning disabilities, etc.).

Methodologies

- Data collection protocols for formalization and modeling perspective
- Corpus design and processing (written, oral and multimodal)
- Quantitative and qualitative analyses
- Phenomenological and interpretative approaches
- Valorization and dissemination (design of deliverables)

Founding member of the ASLAN Laboratory of Excellence "Advanced Studies on Language Complexity"

Examples of institutional partnerships:

ATLIF, IRMA, IXXI, LATTICE, LIRIS, LIDLEM, Praxiling, SFL

Extra-academic exchanges with schools, university libraries, museums, hospitals, associations, laboratories or observation centers and companies.

Examples of private partnerships

The ODIMEDIn project, funded by Pulsalys, provides a digital online self-training tool to improve communication between interpreters, healthcare professionals and patients.

Partnership with the start-up Skilder which offers online games applied to the field of recruitment (soft skills). Financing: Pulsalys, Skilder and MESRI, LabEx ASLAN
